PROFESSIONAL SUMMARY

Analytical and innovative Computer Science graduate with a strong foundation in Data Analysis, Artificial Intelligence, and Machine Learning. Skilled in uncovering insights from data, building predictive models, and developing intelligent systems to solve real-world problems. Certified in Ethical Hacking (EC-Council) and AI/Machine Learning (New Horizons), with hands-on experience in Python, SQL, Power BI, TensorFlow, and Scikit-learn. Adept at combining technical expertise and problem-solving to deliver data-driven, secure, and scalable solutions that support organizational growth and decision-making.

EXPERIENCE

- AI / Machine Learning Intern, New Horizons Learning Center**2024 – 2025
 - Conducted data preprocessing and exploratory data analysis (EDA) to identify trends and prepare data for model training.
 - Built and optimized supervised and unsupervised learning models using Python, TensorFlow, and Scikit-learn.
 - Supported the development of AI solutions to improve model accuracy and operational efficiency.
 - Collaborated on small-scale projects that applied data insights to real-world problems, strengthening understanding of predictive analytics.
- IT Intern (Networking Assistant), OKK Networking Firm**2024 – 2024
 - Assisted with installation and configuration of computer systems and security devices across client networks.
 - Supported cybersecurity assessments and troubleshooting of network connectivity issues.
 - Contributed to the setup and testing of secure LAN environments, improving network reliability and security performance.

EDUCATION

B.Sc. Computer Science, Chrisland University, Abeokuta2025
Graduated: 2025

TECHNICAL SKILLS

Programming Python, SQL	Data Analytics Excel, Power BI, Data Visualization (matplotlib), EDA
Machine Learning TensorFlow, Scikit-learn, Pandas, NumPy	Cybersecurity Ethical Hacking Fundamentals, Penetration Testing Basics
Software Tools Jupyter Notebook, VS Code, Microsoft Office Suite	Operating Systems Windows, macOS, Kali Linux

HOBBIES & INTERESTS

- Technology & Innovation
 - Research & Continuous Learning
- Gym & Fitness
- Football

PROJECTS

AI Facial Recognition System for Home Security

- Designed and implemented a real-time facial recognition system using CNN and Siamese Neural Networks (SNN).
- Integrated email alert notifications for intruder detection via OpenCV, TensorFlow, and Streamlit.
- Enhanced model precision through advanced feature extraction and dataset optimization.

Student Performance Prediction

- Developed a machine learning model to predict student academic outcomes using demographic and academic data.
- Applied data preprocessing, correlation analysis, and model evaluation to improve prediction accuracy.

Network Security Simulation

- Simulated a secure LAN network incorporating firewall configurations and intrusion detection concepts.
- Strengthened understanding of network integrity, system protection, and access control mechanisms.

CERTIFICATIONS

Certified Ethical Hacker (CEH)
EC-Council

Artificial Intelligence & Machine Learning
New Horizons Learning Center

CAREER OBJECTIVE

To grow as a Data and AI Specialist, applying analytical thinking and machine learning knowledge to solve business and security challenges, while learning from experienced professionals in a dynamic and innovative organization.
