

CHIDUBEM BRIGHT ONUBOGU

✉ onuboguchidubem@gmail.com ☎ +234 905 461 2116 📍 Olodi Apapa, Lagos, Nigeria

PROFESSIONAL SUMMARY

Analytical and innovative Computer Science graduate with a strong foundation in Data Analysis, Artificial Intelligence, and Machine Learning. Experienced in building and deploying predictive models, automating data pipelines, and applying AI to solve business challenges. Certified in Ethical Hacking (EC-Council) and AI/Machine Learning (New Horizons), with expertise in Python, SQL, Power BI, TensorFlow, and Scikit-learn. Adept at transforming raw data into actionable insights and creating scalable, secure solutions that enhance organizational performance.

EXPERIENCE

AI and Machine Learning Intern, New Horizons Learning Center 2025

- Performed data preprocessing, cleaning, and exploratory data analysis to identify trends and support model development.
- Developed and optimized supervised and unsupervised learning models using Python, TensorFlow, and Scikit-learn.
- Automated model evaluation processes to improve prediction accuracy and operational efficiency.
- Collaborated with teams to apply data insights to real-world problems and present AI-driven recommendations.

IT Intern (Networking Assistant), OKK Networking Firm 2024

- Assisted with installation and configuration of computer systems and secure network environments.
- Supported cybersecurity assessments and troubleshooting of network performance issues.
- Helped deploy and maintain LAN security protocols, improving reliability and reducing downtime.

EDUCATION

B.Sc. Computer Science, Chrisland University, Abeokuta 2025

TECHNICAL SKILLS

Programming

Python, SQL

Data Analytics

Excel, Power BI, Data Visualization (Matplotlib), EDA

Machine Learning

TensorFlow, Scikit-learn, Pandas, NumPy

Cybersecurity

Ethical Hacking Fundamentals, Penetration Testing Basics

Software Tools

Jupyter Notebook, Visual Studio Code, Microsoft Office Suite

Operating Systems

Windows, macOS, Kali Linux

PROJECTS

AI Facial Recognition System for Home Security

- Developed a real-time facial recognition system using CNN and Siamese Neural Networks.
- Integrated email alerts for intruder detection using OpenCV, TensorFlow, and Streamlit.

- Improved model precision through advanced feature extraction and dataset optimization.

Student Performance Prediction

- Built a machine learning model to predict student outcomes using demographic and academic data.
- Applied data preprocessing, correlation analysis, and model evaluation techniques to enhance accuracy.

Network Security Simulation

- Designed and tested a simulated secure LAN network with firewall and intrusion detection systems.
- Strengthened understanding of system protection and access control mechanisms.

CAREER OBJECTIVE

To grow as an AI and Data Specialist by leveraging machine learning, data analysis, and security principles to design intelligent, data-driven solutions that enhance organizational efficiency and innovation.
